# MY SHORTCUTS TO \$100,000 PER MONTH

If I haven't already, let me stress again that this is a serious opportunity to create your own **sustainable, long-term income**. Furthermore, it is an opportunity to **build a business for you, not for someone else**.

I have watched countless individuals from different backgrounds **quit their jobs and pursue this venture full-time**. Many of them are making **well over ten thousand dollars a month** consistently with the system I am about to share with you.

Don't let insecurities, opinions of others, or fear (of success maybe) stop you from taking action today.

I urge you to take the information in this report seriously. With this program, you'll have access to all of my resources, and my experiences.

I want you to **feel the excitement of breaking free from a dead end job and building something for yourself**. The excitement of **making deals that make you money every single day**. And most importantly, the excitement of **FINANCIAL FREEDOM**.

Make sure you read every word of this document, because it will change your life, if you let it.

## A LITTLE ABOUT ME AND HOW I STARTED

If you have been through any “make money online courses” before and read any of the author’s back stories, then mine is probably not what you’re expecting.

I’m not going to tell you about a kid who struggled with acceptance, who wasn’t really very good at anything. And I’m not going to tell you about a childhood ridden with financial burdens. This is my true story.

I am the son of a beautiful, hard-working mother, and an amazingly supportive italian-immigrant father that are still happily married to this day. My father worked in finance in New York City, and my mother in dentistry. By the early 90’s, their collective income was close to \$200,000.

We lived in a large house in an upper middle class town in South Jersey that, economically, was on an upward surge.

Now, my parents came from nothing. They grew up in somewhat low-income households both with abusive and substance abusing fathers. They overcame many obstacles and worked extremely hard for everything they had. Those values were subsequently passed onto yours truly. They were able to afford me a lot of things, but always balanced it by making me work for others.

I was about 13 when I discovered my passion for music. I got my first job at 14 and saved money for 3 years to buy my first car, and my first REAL guitar (not the baby one I had been playing for 2 years).

# MY SHORTCUTS TO \$100,000 PER MONTH

After high school, I decided I wanted to pursue higher education in music. I studied jazz at The University of the Arts in Philadelphia, and to much dismay, racked up a hefty \$100,000 tab.

To couple that, the economy took a sharp downturn about the time I graduated. Both my parents lost their jobs, and I could barely find work. I spiraled into the “make money online” rabbit-hole. I tried a bunch of different things. Affiliate Marketing, Multi-Level Marketing, Real Estate Marketing; you get the idea. After many failed attempts to find something that truly worked and was sustainable, I almost gave up.

Then, I stumbled on a group of people selling over-the-counter diabetic test strips. They were posting in their forums about how they made \$100, \$200, \$500, even \$1000 dollars in a single day, from little more than an hours worth of time!

Honestly, I’ve never been a skeptic for these sorts of things.

I’m sure most people, and most of you reading this, would have at least some feelings of apprehension. For me, I always thought outside of the norm. I knew that every great business, every great idea, every invention, came with roots of pessimism and doubt; so I always ignored mine.

I private messaged one of the members of this group to get more information and to my surprise, this person was extremely eager to help. He even gave me a few contacts that would buy my future product! To this day, I still do not know who this person was. But I think about them often and I am extremely grateful.

I hit the ground running with the skeleton of a plan I had formed from talking to this Mystery Keyboard Warrior (MKW). I slammed my local area with flyers. I probably covered about 8 square miles in two nights. Driving around town the next day and relishing in my ‘one man street team’ efforts, I eagerly awaited the phone calls....

# MY SHORTCUTS TO \$100,000 PER MONTH

*These are the types of posts that I kept seeing in my facebook feed.  
(Estimated profit - \$1,100)*

Nothing. Not one phone call for 3 days. The MKW told me I wouldn't be able to keep up with the phone calls if I saturated the town. What had happened? Had I done something wrong? I went back out to check and sure enough, most of my flyers were still up.

I didn't get it. I started having doubts at this point. It was only natural. I'd been let down by plenty of "make money quick" schemes, so why would this one be any different?

I always try to keep the space between my ears in a relatively positive place so I played with the logistics in my head. Then, a lightbulb went off.

I came to a realization that the MKW had not mentioned. I went out, collected my signs and flyers, and moved them to a different area. Then it happened. One call, two calls, three calls. It was starting to work. For each call I followed the short script the MKW gave me.

Now, not every call turned into a deal. I still remember these figures. The first week I received 12 calls. Of those 12 calls, 4 of them turned out to be deals. 3 of the deals were fairly small, in terms of profit.

I spent maybe \$20 dollars when I bought the product and made about \$40-\$50 dollars when I sold the product. But one of them was a WHALE. I spent roughly \$250 dollars on the product. When I sold it, I made... \$650! This was the kind of deal the MKW and all the other forum members were talking about. **Drive a total of one hour, and make \$650.**

## CHANGE YOUR MINDSET

I was hooked. Not just on the money (which was amazing), but also on the idea of what this money and this business could allow me to do. The wheels in my head were turning a mile a minute.

If I could find a way to replicate these types of deals, I would truly be able to achieve FINANCIAL FREEDOM. I could start to pay off my student loans and get the creditors off mine and my parents back. I could give back the car that my friend let me borrow and buy my own car. I could quit my dead-end teaching job.

And most importantly, I could afford myself the time to pursue my passion in writing and playing music; truly let my art flourish unencumbered by the external forces of trying to make ends meet.

Before I knew it, I was making a decent amount of money. Or at least compared

*“Decent day” looks like a little over \$300 per day in profit, driving 3-4 hours.  
(Estimated profit - \$625)*

to what I was making playing local gigs and teaching guitar, it was a decent amount of money. I was averaging \$750 per week in profit. Not bad after 30 days.

Then I had a misstep....

# MY SHORTCUTS TO \$100,000 PER MONTH

As a beginner it's easy to make a costly mistake in almost any industry. I lost over \$1,500 dollars in a single day. It was a huge hit to my ego and my bank account. I had just threw a huge chunk of money at my student loans, and paid off a credit card, so this loss was crippling. I was essentially back at square one; ZERO in the bank.

I thought about giving up on it, I won't lie. And in some ways I guess I did. I didn't answer any phone calls or put out any new marketing materials for 3 weeks. I continued to teach the few guitar lessons I had, played my steady gigs on the weekends, and just let my diabetic test strip business slowly become a fleeting thought.

## GREAT THINGS HAPPEN WHEN YOU TAKE MASSIVE ACTION

I'm not exactly sure how it happened or why it happened, but I was able to get my head on straight. I knew the potential of this business. I witnessed it first hand. So I did something that, at the time, scared the hell out of me.

I maxed out my credit cards and bought as much marketing material as my credit line would pay for. Then, I stopped paying my bills. I put all my student loans into deferment for 6 months. Then, I quit my teaching job...

*"Nice little Sunday"*  
*As you can see, it's not uncommon to bring in close to a thousand dollars in one day while working only a few hours.*  
**(Estimated profit - \$960)**

# MY SHORTCUTS TO \$100,000 PER MONTH

## THE SKY IS THE LIMIT

---

I made well over \$20,000 in net profit last month.

I often reflect on the inception of my business, and how far I've come in only 2 years. Some deals were smaller, some were bigger, but the true power of this system is in its consistency. As long as I stay consistent, I know that my next month's profit will be higher than my last month's profit.

I don't ever have to worry about paying my bills, losing my job, or not having the time to fulfill my own wants and desires.

It doesn't matter what hand life has dealt you up to this point. It doesn't matter where you live. It doesn't matter how old you are. It doesn't matter what skills you do or don't have.

How much money you make is ONLY dependent on your drive to succeed. And it is my promise to show you and help you make money in the next 24 hours.

I will do everything in my power to help you succeed. When you make money, I make money! So read on and you'll learn how we can make money together!

## BUYING AND SELLING DIABETIC STRIPS

---

There are many different reasons why people end up with an over-stock of diabetic test strips:

- Mail order companies keep sending test strips to **people that no longer need to use them**
- Doctors prescribe a **different brand of meter** and patients have to use the type of test strips that work with the new meter, so they have left-over test strips from the change
- Some women develop **gestational diabetes during pregnancy**, and will periodically have to test their sugar levels. After the birth of the child, testing is no longer required and they end up with left over boxes of test strips
- When people work hard to get healthy through a well-balanced diet and a good exercise regimen, they will **no longer have to monitor their sugar intake and they will have leftover supplies**
- Some **don't test as often as prescribed**, we all know not everyone follows the doctor's orders all the time

# MY SHORTCUTS TO \$100,000 PER MONTH

Given the situations above, one would expect some form of a rebate/refund system from these manufacturing companies. Well, there isn't one. Unused test strips often expire and go to waste.

Pharmaceutical companies have no incentive for rebates/refunds. It is not uncommon that a person diagnosed with diabetes receives three to five times the number of test strips that they really need.

Subsequently, the pharmaceutical companies are able to bill the insurance companies three to five times the amount of money they would otherwise bill.

The manufacturers of these products are making money hand over fist by sending extra test strips.

These type of medical supplies are an over-the-counter item, meaning no prescription is required. However, without adequate insurance that subsidizes these test strips, they're simply unaffordable.

Bringing these unexpired test strips back to the market is one of the ways to help those people that need them.

We offer our clients the top brands that they know and love, at a fair price.

And that's what we do!

**We purchase unused diabetic strips from people who don't need them any longer, and get them into the hands of those that do.**

My lady has been completely running the business while I've been in Florida. I just asked how things have been going and she sends me this picture. I'm grateful I know how to pick em! Lol

## BUYING TEST STRIPS

### PRODUCT

### PURCHASING PRICE

### SELLING PRICE

This is a box of “Accu-check”. If someone has one of these un-expired boxes, it could be purchased for as little as \$35 per box.

This same box can be sold to a wholesaler for \$80 or more. If you were to buy one from someone for \$35 and sell it to a wholesaler for \$80, you get to keep \$45.

So let’s say I get a phone call from Joanne. She says “I have 8 boxes of Accu-check Aviva Plus 100ct, how much can I get for them?”. I can offer \$35 per box, which is a total of \$280. I could sell them for \$80 each which is a total of \$640. I just made a profit of \$360. Not bad for an hour round trip!

8 boxes x \$35 = \$280 (cost)

8 boxes x \$80 = \$640 (sold)

\$640 - \$280 = \$360 (profit)

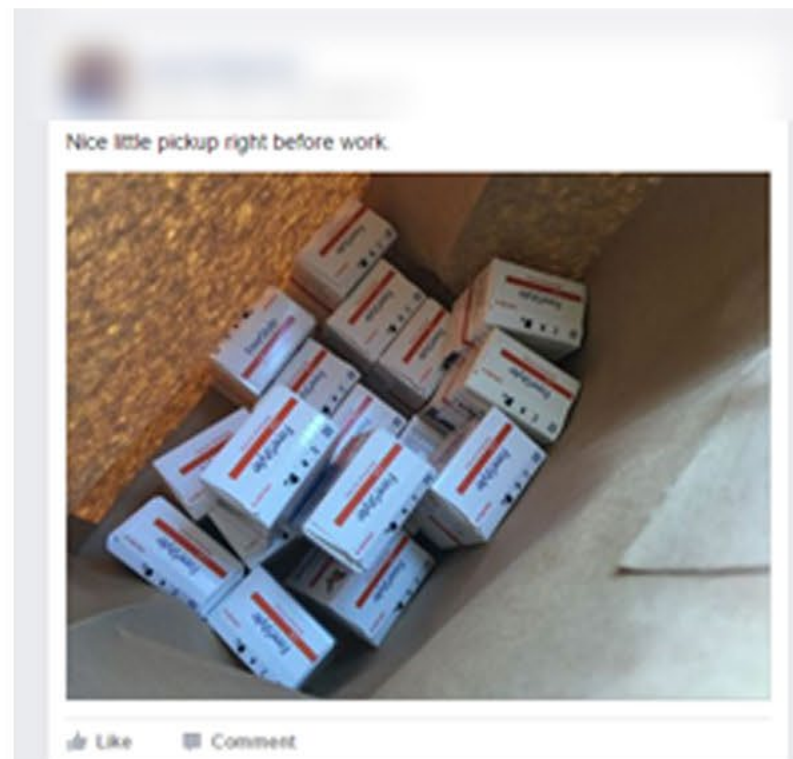

This is a real-life example. Keep in mind that this wasn’t the only transaction I had that day.

AS YOU CAN SEE

# MY SHORTCUTS TO \$100,000 PER MONTH

## IS THIS LEGAL?

### ABSOLUTELY!

While you would have to be licensed and registered with the FDA in order to sell test strips to an end user who is suffering from diabetes, the “wholesale” of these over-the-counter products is 100% FDA COMPLIANT. You would only need licensure if you were selling to the end user.

## WHO CAN I SELL THESE STRIPS TO?

You can sell all your test strips to us! By working directly with Pharma Cash Flow, you will skip the trudges of tracking down these elusive wholesalers.

Once you’re on our team, you will get FULL ACCESS to all of our industry knowledge and resources, allowing you to grow your business at high speed!

Here is what we’re talking about - these are real payments that we made to people like YOU, who decided to work with us:

## ACTION PLAN

1. Find people with test strips.
2. Purchase test strips from them.
3. Sell them to us.

### HOW TO FIND PEOPLE WITH TEST STRIPS

In my mind, there are three types of marketing channels: Free, Cheap and Expensive.

All of these channels work, but as you can guess, some are more effective than others. Some require more time. Some require less time. But ALL of them will yield results that make you money. Remember, the key to any good marketing strategy is consistency.

The best method for most people to get started is the FREE CHANNEL. Let's discuss one of the free channels, and what you need to get started:

### Facebook Marketing

>> Get on your Facebook account and join all the "local yard sale" and "trash to treasure" groups. Type in "your city" or "your county" + "yard sale" or "garage sale"

>> Make a post in every group that simply says "We'll pay cash for your unused, unexpired boxes of diabetic test strips", or anything to this effect. You can test different phrases or "call to action" words as much as you'd like. Make sure to include a picture of some test strips (you can get some free pictures from google). You don't have to a phone number. Simply tell anyone interested in selling to send you a private message.

# MY SHORTCUTS TO \$100,000 PER MONTH

**CASH FOR  
DIABETIC TEST STRIPS**

We accept over 30 different types of test strips

**470.765.6671**

Call us today to find out how much you can get for  
your SEALED, UNEXPIRED test strips.

*This is an example of an ad you can see  
in a Facebook group.*

*Facebook Disclaimer: Make sure you read the rules of  
every group that you join or contact the administrator  
of the group if you're not sure they allow your type of  
post. Certain groups have strict rules and will ban you  
if you violate them.*

Once you make contact with a seller, you need to determine if you have a deal. You will ask them the following questions:

- 1.What brand of test strips do you have?**
- 2.What is the “count per box”?**
- 3.How many boxes do you have?**
- 4.What are the expiration dates on ALL of your boxes?**
- 5.Are the boxes still factory sealed? (meaning they’ve NEVER been opened)**
- 6.What is the condition of the boxes?**
- 7.Do you still have your prescription labels on the boxes?**

DO NOT skip any of these vital questions. If a box has been opened, you do not have a deal! If a box is expired, you do not have a deal! Aside from questions #4 and #5, the rest are aimed to determine what they have and the condition of their product.

Conditions are important. We will purchase some of the “high end” brands if the boxes have been damaged (ripped cardboard, dented), but not the “low end brands”.
